CosmicArmor Cloud Security Platform

Real-Time Cloud Security,Simplified

Overview

Cosmic Armor is built for organizations that want to spend less time sifting through endless alerts and more time taking action on the risks that truly matter. As a leading Cloud Security Platform, Cosmic Armor empowers security teams to work smarter—not harder—by delivering clear, prioritized insights that drive faster, more effective remediation. Trusted by security teams across industries, Cosmic Armor is an enterprise-scalable platform built to protect complex multi-cloud estates with low operational overhead. With seamless integrations into over 50 tools—such as Slack, OpsGenie, Jira, and ServiceNow—Cosmic Armor fits effortlessly into your existing workflows, accelerating outcomes without disrupting operations.

Why Cosmic Armor?

- ✅ Unified Cloud Security Platform
- ✅ Deploys in Minutes
- ✅ 100% Continuous Coverage
- ✅ AI-Driven Risk Prioritization

Trusted by Leading Organizations Globally:

Clientile's if any

A Unified Platform For Complete Cloud Scurity

Cosmic Armor delivers end-to-end visibility and protection across your entire cloud environment—including workloads, identities, configurations, and compliance—on AWS, Azure, Google Cloud, Kubernetes, Oracle Cloud, and more.
Our platform consolidates fragmented tools into a single, seamless solution—eliminating the complexity of managing multiple point products and enabling faster, more effective security operations at scale.

Cloud Security That's Built to Scale

Cosmic Armor uses an agentless-first approach, connecting to your cloud environment in minutes—no disruption, no complex deployment. Our proprietary SideScanning™ technology delivers deep, continuous visibility across your infrastructure without installing agents.
Need real-time protection? We offer a lightweight sensor for critical workloads—scalable, efficient, and designed for speed.

Accelerate Cloud Security with AI

Speed matters in the cloud—and Cosmic Armor puts AI at the center of faster, smarter security. By leveraging advanced Generative AI, we simplify threat investigations, automate remediation, and reduce reliance on deep technical expertise.
The result? Security, DevOps, and engineering teams save valuable time while dramatically improving outcomes across the board.

Cosmic Armor's Defining Features

🚀 Total Visibility. Total Control.

Cosmic Armor continuously protects all cloud assets—without requiring agents—by detecting risks across every layer of your cloud environment. This includes: misconfigurations, vulnerabilities, malware, overprivileged identities, exposed sensitive data, API threats, suspicious activity, AI risks, and more.

Unlike point solutions, Cosmic Armor provides deep, contextual insight into your environment, surfacing interconnected risks that others miss—so you can stop threats before they reach your crown jewels.

🛡️ Compliance, Handled Continuously.

With support for 180+ regulatory frameworks and CIS Benchmarks, Cosmic Armor delivers continuous, automated compliance monitoring. You can fully customize frameworks and schedule detailed reports to ensure your cloud posture meets evolving regulatory and business requirements.

🚀 Security Across the Entire SDLC.

From SCM posture management to static and dynamic code analysis, Cosmic Armor secures every phase of your software development lifecycle. We support advanced tools like SCA, SAST, secrets detection, IaC scanning, and container image scanning—tracing risks back to their source and enabling seamless remediation via Cloud-to-Dev capabilities.

"Cosmic Armor: A Unified Cloud-Native Application Protection Platform (CNAPP)"

- Cloud Security Posture Management (CSPM)
- Cloud Workload Protection (CWPP)
- Vulnerability Management
- API Security
- Cloud Infrastructure Entitlement Management (CIEM)
- Container & Kubernetes Security
- Data Security Posture Management (DSPM)
- Cloud Detection & Response
- Multi-Cloud Compliance
- Application Security
- AI Security Posture Management (AI-SPM)

Where cloud chaos ends—and intelligent defense begins!

Our Current Location

Currently we are placed in:

India HQ

Plot No. 338, Phase 4, Udyog Vihar,
Sector 19 Gurugram – 122016

Expanding Horizons

We are expanding soon in these locations

CANADA

UAE

SINGAPORE
